PROJECTS

Object detection by using modified ResNet50 and YOLO

[Link to Repository](#)

<https://colab.research.google.com/drive/1N6zpnczqzo1A4w2Zf7QA13ylTHBsQD5d?usp=sharing>

Fit a modified ResNet50 model to detect objects in an image and compare the results with YOLO v8

Spotify Analyzer Python

[Link to Repository](#)

<https://github.com/Dipvincer/pythonSpotifyAnalyzer>

A program that analyzes songs from the famous music service Spotify and creates its own selections according to the user's taste

Charity Radar Java/TypeScript

[Link to Repository](#)

<https://github.com/NTDV/charityradar>

Charity foundations aggregator with in-app transactions and auto-raiting by algorithms. Made specifically for the hackathon from VTB

ACHIEVEMENTS

- | | |
|--|----------|
| • Receiving the High Quality Award Cup IT 2024 | Mar 2024 |
| • Winner of the final stage VTB API hackathon | Oct 2022 |
| • Winner of the Olympiad for schoolkids | Jan 2021 |
| • Participant of the final stage of the IT marathon VK Vezdekod | Apr 2021 |

EDUCATION

2021 - present (Moscow) **Higher School of Economics** BS in Informatics and Computer Engineering

TECH STACK

Programming	C++, Python, .NET Core, PostgreSQL
Application	Git (GitHub / GitLab), Docker
DL experience	Computer Vision, NLP

PERSONAL

Languages	English B2+, Fluent Russian
Sport	8 years of swimming, 3 years of mixed martial arts, gym training
